Job Title	Cyber Security Associates (CSA) Associate Cyber Engineer
Location	CSA Security Engineering Team, Gloucester and home working
Salary	Up to £24,000 and benefits
Working Hours	37.5 hours per week, Monday – Friday.
Company Overview	<p>Cyber Security Associates Limited (CSA), established in 2013, provides cyber consultancy and cyber managed services which help to detect, protect and educate against the ever-changing cyber threat. CSA has built its team from a foundation of UK Government (ex-Military) and commercially experienced specialists all holding current and relevant cyber certifications. Today CSA's core services are based around a 24/7 Security Operations Centre (SOC) based in Gloucester.</p> <p>CSA is backed by FluidOne, a market leading connected cloud solutions provider, who provide support and funding firepower for our ambitious growth plans. Our vision is to be the best quality UK cyber security managed service provider. Our mission is to grow to over £10m revenue over the next 5 years adding to our reputation as the go to experts in our field and providing a full range of cyber services to our clients enabling them to focus on running their businesses.</p> <p>CSA's extensive service offering helps businesses understand the cyber threat and the measures they need to put in place to be more cyber secure. All of these services can be applied to the GDPR legislation by meeting the needs to demonstrate that a business has implemented the correct organisational and technical controls to be 'GDPR Ready'.</p> <p>Each of CSA's services cover a variety of areas from training, security assessments, products, crisis response, managed protective and detection capabilities and consultancy services.</p>

	<p>The management team is led by our Managing Director Dave Woodfine and Technical Director James Griffiths. Dave Woodfine is an ex-Military Senior Officer with over 20 years' experience in cyber security operations and continues to provide a number of cyber security assessments, project work and consulting engagements. James Griffiths is an ex-Army Royal Signals Senior Operator, who spent the last five years of service working as an Operator providing cyber offensive capability to the UK government. James provides the technical governance and leadership for all CSA cyber services.</p> <p>Staff culture is key to our success, and the leadership team are committed to ensuring that CSA is an excellent place to work, promoting a team and proactive approach to cyber detection and response, whilst developing our people and having fun along the way.</p>
<p>Job Description</p>	<p>As an Associate Cyber Engineer, you will be working within the Engineering & Development team, working directly for the Head of Engineering.</p> <p>You will be responsible for the day to day delivery of the core services provided by CSA, onboarding new customers, handling customer issues and actively maintaining those systems. Your role will also involve working as a part of the team responsible for developing and improving those core services.</p> <p>You will be a part of a small but highly experienced team, working coherently with the SIOC team to ensure the tools and systems needed to allow the continued delivery of detection and response capabilities within the business.</p> <p>You will be required to work Monday to Friday, working with the team to ensure the core operating hours are covered. There will also be a requirement to join an on-call rota to provide services outside of normal business hours.</p> <p>Primary Responsibilities:</p> <ul style="list-style-type: none"> • Working alongside the service delivery team to onboard new customers. • Providing business as usual (BAU) support to existing clients. • Monitor and respond to issues with core systems. • Fault finding / problem solving. • Researching and building proof of concept of new tools & systems. • Assist in other projects undertaken by the team. • Any other duties as required.
